### **RESEARCH EXPEDITIONS/PROJECTS LED**

I led as Coordinator or Scientific Director 38 excavations and 10 research expeditions/projects. I focused mainly on Tuscany, while since 2013 I started studying other Italian regions, mainly, though not only, in southern and central Italy. My research expeditions have been focused on detecting historical landscapes on the longue durée, though focused on the middle ages and the modern period.

### **SCIENTIFIC PUBLICATIONS**

Since 1993, I published 2 monographs, 9 books as editor (mainly excavations' final reports), 27 papers in peer-reviewed national and international journals, 27 papers in proceedings of national and 16 papers in proceedings of international conferences, 50 papers in collective volumes.

## Ten years track-record

In the last ten years, my research focused to bridge different approaches to the study of the past, to go beyond a site-centred archaeology and to promote new perspectives on historical landscapes. In particular, I focused on three main strands:

1. **predictivity/postdictivity.** After a few years working on spatial analyses, I moved right ten years ago to predictive models, mainly for mobility and resource exploitation. Then I shifted my focus on the concept of postdictivity working on GIS platforms to search for new methods to ask new questions to the material record.
2. **landscape archaeology/archaeogeography.** The link to the French tradition of archaeogeography has allowed me to study the spatial dimension of the historical landscapes as real deposit of a stratigraphy of features and traces beyond the site considered as a mere dot on a blank sheet.
3. **medieval/postmedieval.** Though I always recorded the material evidence of postmedieval features within the sites and the landscapes, only recently I developed a major interest in going beyond the historical periods. Most part of the landscape we field walk today is the outcome of the postmedieval transformations as well as long lasting continuities.

As a teacher, besides my institutional duties, I worked for the internationalisation of the curricula. In particular, I signed several Erasmus agreements, a double degree programme, I prompted the the framework of participation of the Siena University in COIL (Collaborative Online International Learning) and Erasmus Virtual Exchange (I have attended both training courses).

In the past ten years I have published: 2 monographs, 8 papers in peer-reviewed national journals (of whom 6 are A level), 2 papers in peer-reviewed international journals, 6 papers in proceedings of national conferences, 10 papers in proceedings of international conferences, 19 papers in collective volumes.
